What are Mirror Neurons ?

- **Neurons which are active in connection with sensorial and motorical activity**
- **Neurons which are active as during the adspection as during the fulfilling of a movement**

manimalbalance needs

- To set a goal: what do we want and where do we want to go with our animal
- To differ between the essence and the irrelevant points
- To fortify and to support the owner
- To acquire personal social competence
- Not to change the animal, but
- To educate the animal with patience and love

To enter into a relationship means

- Out of an inner sense of clarity and balance →
- Acting effectively and emphatically exoterically

Animals act different as men

■ Men are_

- Materialistic
- Judging
- Condemning
- Extrinsic temptating
- Always bribing

■ Animals are

- Acting value-free
- Living authentically
- Never forget injustice
- Have a strong hierarchy
- A natural selection

The communication process

■ Men learn acc. to the

- Law of cause and effect
- Law of oscillation
- Law of abundance
- Law of resonance
- Law of polarity

■ Animals live in a

- Property of stability
- Property of perseverance
- Property of fight
- Property of surviving
- Property of consequence

1. The law of cause and effect

- Every creation has an impactation
- Behind a creation is a creator, whose will emanates qualitatively and quantitatively
- Out of nothing comes nothing
- Is not accidentally or simply luck for an event of unexplainable reasons

2. The law of Oscillation

- Everything is moving, nothing stands still
- Vacuum compression waves and material compression waves are nothing else but vibrations of different frequencies
- Any thought, any feeling, any wish or will is a vibration of a special frequency and acting thus in its content and power
- Everything is vibrating and living

■ Before...

and after dogmanship

3. The law of Polarity

- Anything has two poles, is Yin and Yang and the middle
- As soon as we realise that anything has to consist out of that polarity we realise that standing in-between we agree with
- We are balanced in the middle of two extremities and thus in harmony with the universe and ourselves

4. The law of abundance

- The abundance is our heritage, which we earned as our spiritual present in any moment of our life
- Only through a wrong spiritual and mental state we obtain already an intrinsic or extrinsic loss of abundance
- To be a part of that abundance I have to transmit my micro EGO to my pure SELF

**Neglected
women, smoking
with cell phone
and a very sick
Sheppard**

5. The law of Resonance

- Identical frequencies come into resonance with each other (Piano \leftrightarrow Fiddle)
- Thus we may transmit energy from our self to something coming into resonance with us
- Everybody and every animal is oscillating within another frequency and living within another world
- The dominant thoughts, feelings and predilections are the reason for success or failure

**Un-
noticed
in-
between**

The success of education

- Through professional and correct conditioning
- Has to be gained and not hoped-for or desired
- Animals should not be lured and bribed during the learning phase

REAKTION

AKTION

»Geh ganz weit weg!
Flieh!«

Auge in Auge. Schultern parallel. Finger offen/Arme ausgestreckt.

Ohr zum Menschen gerichtet: »Ich habe Respekt vor dir.«

Gesprächsbereit: Arme ausgestreckt. Auge in Auge. Finger offen. Druck aufrechterhalten. gesprächsbereit sein.

Verkleinern des Zirkels: »Ich fühle mich sicher in deiner Nähe.«

Arme ausgestreckt. Auge in Auge. Strick werfen. Druck weiter aufrechterhalten. bis es zum Gespräch kommt.

Lecken und Kauen

Arme ausgestreckt. Auge in Auge, auf das Pferd zugehen. Strick werfen. »Ich will noch besser ins Gespräch kommen.«

Kopf gesenkt: »Ich überlasse dir den Vorsitz bei unserem Treffen.«

Einen Arm vor der Körpermitte. immer noch Augenkontakt mit dem Pferd. eventuell langsamer werden.

Das Pferd überdenkt seine Optionen: »Soll ich in seine Herde gehen? Ist er ein würdiger Führer?«

Passiv werden. Augen gesenkt. Schultern im 45-Grad-Winkel. »Möchtest du zu mir herkommen zum JOIN-UP?«

»Bei dir ist gut sein. Du fühlst dich sicher an.«

»Willkommen zum JOIN-UP.«

»Ich kann nicht dahin sehen, wo du mich berührst. Ich glaube, ich traue dir.«

»Ich danke dir.« Belohnung

Animals have the need

- To have the feeling, that we pay unrestricted attention to it
- To have the possibility to follow the owner with confidence and being able to neutralise environmental pollution
- To have the possibility of narrow contact, love and unrestricted care and brush
- To share the food, playing and last been bribed

**The
phenomenon
of resonance,
tuning fork
and Guitar**

3 2 1 0

The strategy of communication needs

- **Movement** (re vacuumisation)
- **Discipline** (strictly keeping standards, rules and prescriptions in a large scale of an educational process)
- **Affection** (a positive loving disposition or state of mind or body)
- **Cosmic melody** (to be involved into the spectrum of natural logarithmic cosmic vibration)
- **As long as reliability and safety is gained**

06.02.2006

Many owners buy an animal of one's dream

- And the reality of having an new young animal corresponds not to that what they were expecting in advance
- The new young one should be able to fulfil immediately the same obedient, heartily qualities as the former one

**Buying a horse
according to
your dreams**

The goal for the
rider was to
loose weight

Something else
happend
